ProCKSI - Bug #30

Check domain name of email address before accepting request

11/23/2007 04:00 PM - Anonymous

Status: Start date: New **Priority:** Normal Due date: % Done: Assignee: Anonymous 0% **Estimated time:** Category: 0.00 hour Target version: 9.1 **Resolution:**

Description

- Currently, email addresses are accepted if they adhere to the general syntax of an email address:

[label 1[.label 2]] @ [further level domains.] second level domain. to plevel domain and the property of the

This means that something like <u>x@xxx.xx</u> is perfectly valid.

- In the future, emails should be checked if at least the domain exists, although his does not guarantee that the email address really does exist.
