

ProCKSI - Enhancement #62

Deployment script

12/05/2007 04:50 PM - Anonymous

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Anonymous	% Done:	0%
Category:	ProCKSI	Estimated time:	0.00 hour
Target version:	9.0		
Resolution:	fixed		

Description

Setup script should be able to prepare the working copy to be checked in to the repository.
Changes that have been made outside the 'install' directory must be translated and made available within the 'install' directory[[br]]

- Additional symlinks must be detected and a warning be issued
- In files in the HTML and TMPL directories,
 1. <TMPL_ and </TMPL_ tags must be substituted to <TMPL#_ and </TMPL#_, respectively, in order to mask them for the next installation process.
 2. all values that have been substituted during the previous installation process, e.g. all SERVER_, DATABASE_, APACHE_, INSTALL_ and SMTP_ template tags, must be substituted back. E.g. "quickstep.cs.nott.ac.uk:8081" => <tmpl_var name='SERVER_NAME'>

History

#1 - 11/28/2007 05:18 PM - Anonymous

- Status changed from New to In Progress

#2 - 12/05/2007 04:50 PM - Anonymous

- Status changed from In Progress to Closed

- Resolution set to fixed

(In r530) f - setup.pl: deployment mode that translates changes made in the installed version into the templates, which are located in the install directory

a - SVN: allow keyword substitution of Revision and Date

b - ROC analysis: check for .list file types

a - add sources for tooltips

closes #62, #63, #64, #65
